Sahloul 3, Sousse, 4054 Tunisia

PROFESSIONAL SUMMARY

Data Science and AI engineering student with a background in business intelligence, big data, software development, and data automation. Experienced in working with SQL, Python, databases, dashboards, APIs, and structured data workflows through academic and professional projects. I enjoy working on roles where data has to be collected, cleaned, transformed, and made reliable for real business use. Interested in data engineering, ETL processes, cloud technologies, and building data solutions that are clear, useful, and dependable.

PROFESSIONAL EXPERIENCE

- **AI and Business Development Trainee** *June 2026 - Ongoing*
OliveSoft Paris, France (Remote)
 - Worked on AI and automation ideas to support internal workflows, reporting, and daily productivity.
 - Used n8n to structure workflow automations, connect tools, and improve follow-up of tasks and information.
 - Worked with Microsoft 365 tools such as Excel, SharePoint, Power Automate, Teams, Outlook, and Copilot to support documentation, coordination, and workflow tracking.
 - Created clear proposal and presentation material to explain services, workflows, value proposition, and possible AI use cases.
 - Presented progress and ideas to the team, linking technical possibilities with business needs.
- **New Sales and Business Development Leader** *Jan 2025 - Feb 2026*
AIESEC International Montreal, Canada
 - Built and maintained relationships with international companies to create partnership opportunities.
 - Led outreach initiatives connecting businesses with AIESEC's global talent programs.
 - Managed external relations with international organizations such as UNIDO and the United Nations.

Achievement: Invited to attend the United Nations General Assembly (UNGA) in September 2025, initiated communication with Autodesk and organized a major SAP event at NYIT in New York.
- **National Executive Board Member – Global Talent and Business Development** *Aug 2024 – July 2025*
AIESEC in Belgium vzw/asbl Brussels, Belgium
 - Managed international talent recruitment and integration, working with corporate partners to understand hiring needs and match them with suitable candidate profiles.
 - Built an automated CV screening process on AIESEC's internal platform (EXPA), making candidate shortlisting faster and more consistent.
 - Supported outreach activities by identifying target groups, preparing communication approaches, and following up with companies and candidates.
 - Worked with recruitment data and partner feedback to improve matching, reporting, and decision making across the talent process.

Achievement: Achieved 70% growth in the DHL partnership and 60% growth with UCB, and initiated events with IBM, Reckitt, and Henkel.
- **National Executive Board Member – Finance, Legal and Information Management** *Aug 2023 – July 2024*
AIESEC in Belgium vzw/asbl Brussels, Belgium
 - Developed budgets and organized General Assemblies, ensuring accurate financial follow-up and clear visibility on financial data.
 - Managed legal documentation and cross-border agreements, maintaining structured records to support compliance and traceability.
 - Worked closely with government authorities regarding trainees' work permits, ensuring reliable information flow and timely updates.
 - Organized and structured financial and legal information to improve accessibility, reporting, and decision making at national level.

Achievement: Built an automated national dashboard bringing together data from over 55 sources, reducing repetitive reporting work and allowing team leaders to focus more on data analysis and decision making.

• Final Year Project Internship – Software Developer / Data Integration

Feb 2022 - July 2022

Mobelite

Monastir, Tunisia

- Developed a mobile application and web platform for flight reservations, working on both backend and frontend components.
- Integrated real-time flight and booking data using Amadeus APIs to support comparison by price, availability, and schedules.
- Worked with API responses, application data, and database interactions to support reliable data display across web and mobile interfaces.
- Tested data flows and application features to identify issues, improve consistency, and support a smoother user experience.

Achievement: Final year project grade: 17/20.

EDUCATION

• Engineering Degree in Data Science and Artificial Intelligence

Sept 2025 - May 2027 (Ongoing)

Polytechnic School of Sousse, Tunisia

- Focused on data science and artificial intelligence with coursework and projects in machine learning, big data, advanced data processing, and intelligent systems.
- Built academic data projects using Python, SQL, Git, AWS basics, and data processing concepts, with focus on data cleaning, transformation, debugging, and reliable execution.

• Master's Degree in Big Data Analytics and E-commerce

Sept 2022 - June 2023

Institute of Higher Commercial Studies of Carthage, Tunisia

- Worked on big data analytics and large-scale data processing, handling complete data workflows and using data outputs to support decisions in digital business contexts.

• Bachelor's Degree in Business Intelligence

Sept 2019 - June 2022

Higher Institute of Management Studies of Sousse, Tunisia

- Focused on data analysis, reporting, and building dashboards to support everyday business decisions.

Graduated as Valedictorian of the class.

LEADERSHIP AND VOLUNTEER EXPERIENCE

• GDPR Compliance Specialist

Sept 2023 – Jan 2024

AIESEC International

Montreal, Canada

- Supported GDPR compliance processes and data privacy practices for international operations.

• Conference Management

Aug 2023 – May 2025

AIESEC in Belgium

Belgium

- Held conference leadership roles as Conference Manager (NatCo 2023 & 2024) and Agenda Manager.
- Coordinated agenda design, event planning, logistics, and stakeholder communication (SpringCo 2025).

• Vice President of Talent Management & Human Resources

Feb 2022 – Jan 2023

AIESEC Hadrumet

Sousse, Tunisia

- Led recruitment, development, and performance follow-up for 140+ members.

• Organizing Committee Member – Sales & External Relations

Sept 2021 – Jan 2022

AIESEC Hadrumet

Sousse, Tunisia

- Supported partnership outreach and external relations for big events with 2,000+ attendees.

TECHNICAL SKILLS

- **Data Engineering and ETL:** ETL concepts, data pipelines, data ingestion, data transformation, data quality checks, data integrity, data cleaning, workflow automation
- **Programming and Querying:** Python, SQL, Java, C++, C#, JavaScript, PHP, Swift
- **Cloud and Development Tools:** AWS basics, Git basics, Linux basics, command line basics, Microsoft 365, Power Automate, n8n
- **Big Data and Business Intelligence:** Hadoop, Spark, Talend, Power BI, dashboarding, KPI reporting, data modeling
- **Databases:** MySQL, Oracle, PL/SQL, MongoDB
- **Software and API Development:** REST APIs, API integration, Angular, Symfony, Flutter, HTML/CSS
- **Development Practices:** Agile/Scrum, SDLC, development tasks, production support basics, issue fixing, daily progress reporting, documentation

LANGUAGES

- **Languages:** Arabic (Native), English (Fluent), French (Fluent), German (A1)
